DELTA Elettronica Srl

ABOUT US

The Company

Delta Elettronica, on the market since 1978, has become the reference for the distribution of electronic components, industrial PCs and display solutions in the Italian and foreign market. Thanks to consolidated partnerships with biggest international suppliers, the company can access competitive prices and ensure stock management to guarantee a high quality service to the customer.

The services

Thanks to its network of salespeople located throughout Italy, Delta Elettronica can support customers throughout the country and internationally. In addition to its direct distribution relationship with major manufacturers in the field of semiconductors, passive components, industrial PCs, and displays, Delta can boast long-standing partnerships with major distributors internationally, selling products from the most important electronic component manufacturers.

Stock management - Scheduled orders - Excess stock

Delta Elettronica can provide stock management for customers, with the aim of providing stable supply service even in allocation market conditions.

In addition, Delta Elettronica can also manage supply contracts with scheduled orders and provide over-stock management service.

Missing search and obsolete components

With 40 years of experience in the industry, sales offices in America and Asia, and an extensive network of partners, Delta Elettronica is able to provide a search and resale service for allocated and obsolete components, subjecting all products not sourced from official channels to testing at qualified facilities and providing COCs and certificates of conformity upon customer request.
